CALIFORNIA PATIENT DISCHARGE DATA

INTRODUCTION

Patient Discharge Data: Public Patient-Level Dataset

The California Office of Statewide Health Planning and Development (OSHPD) provide a public dataset of the Patient Discharge Database available for purchase on compact disc (CD). The data is made available by OSHPD once it has been screened by the automated reporting software and corrected by the individual hospitals. The public patient-level dataset includes patient zip code, demographic variables and clinical information

The public dataset is comprised of a record for each inpatient discharged from a licensed acute care hospital. This includes: General Acute Care Hospitals, Acute Psychiatric Hospitals, Chemical Dependency Recovery Hospitals, and Psychiatric Health Facilities. (Note: the only exceptions are records not reported by some California State Hospitals; see the State Hospitals discussion on page four.)

The patient discharge dataset is available for discharges in each calendar year. The data on CD-ROM are stored on one CD containing three zipped data files and a full set of documentation files. The discharge records are divided into three sets by the geography of the reporting hospitals. One file contains discharge records from hospitals in Los Angeles County, another file contains discharges from the seven other counties in Southern California and the third file contains discharges from hospitals in the remaining 50 Northern California Counties.

Masked variables

To protect patient confidentiality, those records with unique combinations of a select set of demographic variables will have one or more of those variables masked to make sure the files are de-identified. Each unique record will have the minimum number of fields masked to ensure the data is longer unique. The variable masking will occur in the following order:

ORDER OF MASKING	DATA FIELDS SUBJECT TO MASKING
1 st	Age in years (at admission)
2 nd	Ethnicity
3 rd	Race
4 th	Sex
5 th	Age Category 20 (20 Age Categories)
6 th	Age Category 5 (5 Age Categories)
7 th	Small County Groups*
8 th	Admit Quarter
9 th	Patient Zip Code **
10 th	OSHPD ID
	<i>*Small counties with total populations of 30,000 or less are grouped into 3 categories: Central (CE), Northeastern (NE), and Northwestern (NW). Ten counties were grouped in 2002: Central: Alpine, Inyo, Mariposa, Mono; Northeastern: Modoc, Plumas, Sierra; Northwestern: Colusa, Glenn, and Trinity.</i>
	<i>**Five-digit zip will be masked to three-digits; if record is still unique, zip will be totally masked with an asterisk.</i>

General assistance is available by calling OSHPD's Healthcare Information Resource Center at (916) 322-2814.

CALIFORNIA PATIENT DISCHARGE DATA

January-December 2002

IMPORTING NOTES:

The fields listed below contain numeric codes, which are not numeric values; most PC software will treat these fields as numeric values unless formatted otherwise. Thus, when importing the data into your software, these fields should be formatted as text or alphanumeric to retain the leading and trailing zeros. Also, when a text variable is masked, the field value is an asterisk, which may cause errors if imported as numeric.

- OSHPD-Hospital Identification Number
- 5 Age Category and 20 Age Category Fields
- Sex
- Ethnicity
- Race
- Patient Zip Code
- County of Patient's Residence
- Admission Quarter
- Expected Principal Source of Payment – Plan Code Number
- MDC
- DRG
- **All** diagnosis code fields (principal and other)
- **All** procedure code fields (principal and other)

It is especially important that all Diagnosis and Procedure code fields be formatted as “text.” These fields are comprised of ICD-9-CM codes, some of which begin with alpha characters that cannot be read if not formatted as text. Also, many ICD-9-CM codes have leading and/or trailing zeros. For example, the ICD-9-CM code for *Salmonella Gastroenteritis* is “003.0”. If it is not formatted as text, it will appear as “3”, which is the numeric value, but is not the valid diagnostic code for *Salmonella Gastroenteritis*.

It is not absolutely essential but is recommended, to maintain leading zeros in the other codes that contain leading zeros (Hospital Identification Number, Patient's County of Residence, MDC, DRG, and Payer Plan Code Number). When these fields are formatted as “text,” the number of digits in each respective field will then remain constant. For example, Alameda County will then appear as “01”, rather than “1”, and will contain two digits like the other 2-digit county codes (Fresno through Yuba, 10 through 58, respectively).

COMMA DELIMITED DATA FORMAT

In the comma-delimited set, the length of each field and the length of each record will vary according to the data reported. To assist you in using the comma delimited patient discharge data sets, a header row identifying each data element is provided in the position of the first record.

Each data element is separated by a comma and is defined and described in this documentation. In Appendix I, there is a table listing the Field Label (used in the header row), Field Name, Field Type (format), and Maximum Number of Characters.

Fields with no data will have consecutive delimiters (commas). Most PC software will have no difficulty with consecutive delimiters. However, some software packages may handle consecutive delimiters as a single delimiter and adjustments will need to be made.

Note: It is possible for some invalid values to remain in the database “as reported” by the hospital, due to a lack of database enforced integrity. This means that for some observations, you may find blank values, invalid alpha characters in numeric fields, out-of-range numeric values, etc.

CALIFORNIA PATIENT DISCHARGE DATA

January-December 2002

FACILITY EXCEPTIONS

State Hospitals:

Through the first half of 1989, the database included twelve state hospitals. As of July 1989, the eleven operated by the Department of Mental Health or the Department of Developmental Services, serving mentally disordered and developmentally disabled patients, no longer report discharge data. The twelfth, the Veterans Home of California, Nelson M. Holderman Memorial Hospital, in Yountville has continued to report discharge data. Records from this hospital can be located using the Hospital Identification Number "281297."

Psychiatric Health Facilities:

Psychiatric Health Facilities, which provide care in licensed Acute Psychiatric beds, are subject to the same reporting requirements as other California hospitals. This type of hospital was first licensed in California in 1988. Patient discharge data for 1989 and for January through June 1990 included data from six Psychiatric Health Facilities; data for July through December 1990 include data from all but one of the 16 licensed Psychiatric Health Facilities. All of these facilities started reporting their patient discharge data beginning in 1991.

Modifications and Non-Compliant Facilities:

Some hospitals have applied for and been granted "modifications" to standard Patient Discharge Data reporting requirements. Other hospitals were unable to complete specific fields as required and were deemed "non-compliant" at the time of reporting. See Appendix D (Data Exceptions) for a listing of all non-compliant hospitals and those with approved modifications and their affected variables.

Defaulted Variables

Invalid or missing values (submitted below the error tolerance level) are defaulted to "unknown." The table below displays default numbers and percentages.

Default Status	Numbers of Records	Percent of Records
Not Defaulted	3,905,541	99.72%
One Variable Defaulted	10,365	.26%
Multiple Variables Defaulted	457	.01%

VARIABLE CHANGES

Hospital Identification Number:

The first six characters of each record contain the "Hospital Identification Number". Beginning with data reported for 1995, this former nine-digit hospital identification number was restructured to six digits. The former first digit, that indicated the type of care reported, has been made a separate data element (Type of Care) and is described below. The former filler number "06" (2nd and 3rd digits) has been dropped. Thus, the hospital identification number now consists of the following six digits: the first two indicate the county and the last four are unique to a facility within each county.

CALIFORNIA PATIENT DISCHARGE DATA

January-December 2002

Type of Care:

The second field on each record is a single digit field that describes the "Type of Care" ("Level of Care" in 1995 and 1996) from which the patient was discharged. The Type of Care codes and labels are:

- 1 = Acute Care
- 3 = Skilled Nursing and Intermediate Care (frequently known as Long Term Care)
- 4 = Psychiatric Care
- 5 = Chemical Dependency Recovery Care
- 6 = Physical Rehabilitation Care

Note: there has never been a Type of Care or Level of Care code "2".

Beginning with 1997 data, hospitals were required to report one of the **five** Types of Care, above, for each discharge.

For the 1995 and 1996 data years, hospitals were required to assign, to each discharge, one of **three** Levels of Care ("3" for Long Term Care, "6" for Rehabilitation Care and "1" for all other types of care).

Prior to 1995, discharges were optionally reported in sets, by one of the five Types of Care. Most hospitals chose to include all discharges, regardless of the type of care, in one set (usually acute care).

AGE IN YEARS (at Admission)

FIELD NAMES : AGE_YRS

DEFINITION : Age of patient at time of admission.

CODES, CATEGORIES AND COMMENTS:

Age = Blank indicates age has been masked or is unknown (the year of birth is incomplete or unknown and an age of 0 has been assigned).

Newborns are identified with a code 7 in Source of Admission or infants (less than 24 hours old) are coded with a 3 in Type of Admission.

To reduce the need for masking to protect patient confidentiality; all patients older than 85 will be coded as "85" years of age. This can be considered "85 and older."

If necessary, Age in Years will be the first variable masked to de-identify unique patient records, by blanking-out reported age. This is the only numeric data element that will be masked; all other variables subject to masking are text variables and contain an asterisk when masked.

PATIENT ZIP CODE
FIVE DIGIT / THREE DIGIT

FIELD NAME : PATZIP

DEFINITION : The ZIP Code of the patient's residence (all five digits). This is a unique code assigned to a specific geographic area by the U.S. Postal Service for the patient's usual residence.

CODES, CATEGORIES AND COMMENTS:

The five digits of the ZIP Code of the patient's residence.

If the field is coded with XXXXX, the ZIP Code is unknown.

If it is coded with YYYYY, the patient is from an area outside the United States.

If it is coded with ZZZZZ, the patient has no residence (homeless).

If the first three digits are the only digits reported then it is a partial ZIP Code. It will be shown as a 5-digit ZIP code—the first three digits plus '00'. Example: Sacramento, CA 95800. There are no partial ZIP codes in the 2001 or 2002 data.

The reported ZIP Code will be the 8th variable masked if necessary to de-identify unique patient records to protect patient confidentiality. The Patient ZIP Code can be masked sequentially from 5-digits to 3-digits, then from 3-digits to just an asterisk, if required to de-identify the record.

CALIFORNIA PATIENT DISCHARGE DATA
January-December 2002

COUNTY OF PATIENT'S RESIDENCE

FIELD NAME : PATCNTY

DEFINITION : The patient's zip code is used to assign a county of residence.

CODES, CATEGORIES AND COMMENTS:

Codes: 00-58, CE, NE and NW

01-58 indicates a county in California (see list in Appendix A); 00 indicates that the patient's zip code was unknown, outside California, outside the U.S., or homeless; blanks indicate the patients ZIP Code was unreported or partial. Data for 2001 and 2002 are the only data in which some records have a blank patient county.

If the first three digits of the patient's ZIP code are the only digits reported then it is a partial ZIP Code. There are no partial ZIP codes in the 2001 or 2002 data.

To protect patient confidentiality, those counties with populations less than 30,000 are assigned to one of three groups of small counties to de-identify unique patient records. The groups and counties included are:

GROUP	COUNTIES
CE (Central)	Alpine, Inyo, Mariposa and Mono
NE (North East)	Modoc, Plumas and Sierra
NW (North West)	Colusa, Glenn and Trinity

Note – Using the reported ZIP Code, OSHPD assigns the patient's county of residence. ZIP Codes are designed for mail delivery, not to identify political boundaries. Therefore, some ZIP Codes cross county boundaries. For such ZIP Codes, OSHPD assigns the county with the greatest population in the respective ZIP Code.

CALIFORNIA PATIENT DISCHARGE DATA
January-December 2002

LENGTH OF STAY (Days)

FIELD NAME : LOS

DEFINITION : Total number of days from admission date to discharge date of each patient.

CODES, CATEGORIES AND COMMENTS:

The days are calculated by subtracting the Admission Date from the Discharge Date. The length of stay for patients admitted on day one and discharged on day two is counted as one day.

Patients admitted and discharged on the same day yield a calculated length of stay of "0" days. This requires changing those (same-day admits and discharges) zeros to "ones" before performing average length of stay calculations to achieve more meaningful average length of stay calculations.

The number of days is right justified and zero filled (for fixed-length data format).

In the event of a cardiac or pulmonary arrest, resuscitative measures include, but are not limited to, the following: cardiopulmonary resuscitation (CPR), intubation, defibrillation, cardioactive drugs, or assisted ventilation.

Code Category

Y = Yes - a DNR order was written at the time of or within the first 24 hours of patient's admission to the hospital.

N = No - a DNR order was not written at the time of or within the first 24 hours of the patient's admission to the hospital.

All other values for Prehospital Care and Resuscitation are not considered valid.

DEFINITION : This code indicates the type of coverage for the following: Medicare, Medi-Cal, Private Coverage, Workers' Compensation, County Indigent Programs, and Other Government.

CODES, CATEGORIES AND COMMENTS:

<u>Codes</u>	<u>Category</u>
1	= Managed Care - Knox-Keene/MCOHS
2	= Managed Care – Other
3	= Traditional Coverage
0	= Payer Type field is not considered applicable for payer categories other than: Medicare, Medi-Cal, Private Coverage, Worker's Compensation, County Indigent or Other Government.

All other values of Payer Type are not considered valid.

Managed Care - Knox/Keene-Medi-Cal County Organized Health System. Healthcare service plans, including Health Maintenance Organizations (HMO), licensed by the Department of Corporations under the Knox-Keene Healthcare Service Plan Act of 1975. Includes Medi-Cal County Organized Health Systems (MCOHS).

Managed Care-Other. - Healthcare plans, except those above, which provide managed care to enrollees through a panel of providers on a pre-negotiated or per diem basis, usually involving utilization review. Includes Preferred Provider Organization (PPO), Exclusive Provider Organization (EPO), Exclusive Provider Organization with Point-of-Service option (POS).

Traditional Coverage. - All other forms of healthcare coverage, including the Medicare prospective payment system, indemnity or fee-for-service plans, or other fee-for-service payers.

PAYER PLAN CODE

FIELD NAME: : PAY_PLAN

DEFINITION : This four-digit code number refers to the name of those plans which are licensed under the Knox-Keene Healthcare Service Plan Act of 1975 or designated as a Medi-Cal County Organized Health System (MCOHS).

CODES, CATEGORIES AND COMMENTS:

The Plan code number represents the name of the Knox-Knee licensed plan or the Medi-Cal County Organized Health System. See Appendix E for the plan code names and numbers.

If the Payer Plan Code field is not applicable, determined by Type of Coverage, the Plan Code is zero filled (i.e. assigned a value of "0000").

Only values for Payer Plan, listed in Appendix E, are considered valid.

If the plan **code numbers** are the **same** and the **plan names** are different, it means they belong to same "parent" plan.

TOTAL CHARGES

FIELD NAME : CHARGE

DEFINITION : Total Charges include all charges for services rendered during the length of stay for patient care at the facility, based on the hospital's full established rates.

CODES, CATEGORIES AND COMMENTS:

Charges include, but are not limited to, daily hospital services, ancillary services and any patient care services. Hospital-based physician fees are excluded. Prepayment (e.g. deposits and prepaid admissions) are not deducted from Total Charges.

If a patient's length of stay is more than 1 year (365 days), Total Charges are reported for the last year (365 days) of stay only. To calculate Adjusted Total Charges for stays over one year use the following formula:

$$(\text{Total Charges} / 365 \text{ days}) \times \text{Length of Stay} = \text{Adjusted Total Charges}$$

Total Charges are expressed in whole dollars. However, there is a specific meaning attached to the three values of "total charges," below:

Where total charges equal 1 - the "1" is a code meaning that there were no (\$0) charges generated for the hospital stay (and was verified by the hospital). All Shriner's Hospital discharges are coded as "1" because they do not charge their patients. Note - The "1" allows the aggregation of all discharges with "valid total charges" by selecting those with total charges greater than zero.

Where total charges equal 0 - the "0" is a code meaning that there was a charge, but that the amount of the charge could not be reported by the hospital. For example, all Kaiser Foundation Hospitals are exempted from reporting total charges because they do not charge specifically for an inpatient stay, rather, they receive a constant monthly (capitated) payment from each member, whether or not that member is hospitalized, or received outpatient care or no care at all.

Where total Charges equal 9999999 -The total charge of "9999999" indicates the actual charges exceed the seven digit field size utilized by the hospital or designated agent.

EXTERNAL CAUSE OF INJURY -- PRINCIPAL E-CODE

FIELD NAME : ECODE_P

DEFINITION : The external cause of injury consists of the ICD-9-CM codes E800-E999 (E-Codes), that are used to describe the external cause of injuries, poisonings, and adverse effects. If the information is available in the medical record, E-Codes sufficient to describe the external cause are reported for discharges with a principal and/or other diagnoses classified as injuries or poisonings in Chapter 17 of the ICD-9-CM (800-999), or where a code from Chapters 1-16 of the ICD-9-CM (001-799) indicates that an additional E-code is applicable. The reporting of E-Codes in the range E870-E879 (misadventures and abnormal reactions) is not required. The principal E-Code is reported only for the inpatient hospitalization during which the injury, poisoning, and/or adverse effect was first diagnosed and/or treated.

To assure uniform reporting of E-Codes, when multiple codes are required to completely classify the cause, the first (principal) E-code will describe the mechanism that resulted in the most severe injury, poisoning, or adverse effect.

CODES, CATEGORIES AND COMMENTS:

The valid E-Codes are specified in Chapter 17 of the ICD-9-CM codebook. External cause of injury was not required for discharges before July 1, 1990.

CODE STRUCTURE (examples):

Content of Field: E9068 Would be read as: E906.8

Content of Field: E899 Would be read as: E899.

(Implied decimal is read after the first four positions.)

EXTERNAL CAUSE OF INJURY - OTHER E-CODES

FIELD NAME : ECODE1, ECODE2, ECODE3, and ECODE4

DEFINITION : The external cause of injury consists of the ICD-9-CM codes E800-E999 (E-Codes), that are used to describe the external cause of injuries, poisonings, and adverse effects. If the information is available in the medical record, E-codes sufficient to describe the external cause are reported for discharges with a principal and/or other diagnoses classified as injuries or poisonings in Chapter 17 of the ICD-9-CM (800-999), or where a code from Chapters 1-16 of the ICD-9-CM (001-799) indicates that an additional E-code is applicable. The reporting of E-Codes in the range E870-E879 (misadventures and abnormal reactions) is not required. An E-Code is reported only for the inpatient hospitalization during which the injury, poisoning, and/or adverse effect was first diagnosed and/or treated.

If the principal E-Code does not include a description of the place of occurrence of the most severe injury, or poisoning, an additional E-Code is reported to designate the place of occurrence, if available in the medical record. Place of occurrence is coded as E849.0 - E849.9. Up to three additional E-codes will be reported, if necessary to completely describe the mechanism(s) that contributed to, or the causal events surrounding, any injury or poisoning, or adverse effect first diagnosed and/or treated during the current inpatient hospitalization.

CODES, CATEGORIES AND COMMENTS:

The valid E-Codes specified in Chapter 17 of the ICD-9-CM codebook. External cause of injury was not required for discharges before July 1, 1990.

CODE STRUCTURE (examples):

Content of Field: E9068 Would be read as: E906.8

Content of Field: E899 Would be read as: E899.

MAJOR DIAGNOSTIC CATEGORY
(MDC)

FIELD NAME : MDC

DEFINITION : MDCs are mutually exclusive categories containing all possible principal diagnosis areas. The diagnoses in each MDC correspond to a single major organ system or etiology, and in general are associated with a particular medical specialty. Some MDCs are residual categories containing diseases or disorders that could not be assigned to an organ system-based MDC. OSHPD purchases the DRG Grouper software from Centers for Medicare and Medicaid Services (CMS) contractor, 3M® Health Information Systems. CMS implements revisions to the DRG Grouper software effective October 1, the start of the Federal fiscal year for the Medicare Prospective Payment System. The Office implements the same software effective with discharges from the beginning of the following calendar year. DRG Grouper Version 18.0, which was implemented by CMS on October 1, 2000, is the DRG Grouper applied to the Office's calendar year 2001 patient discharge data.

The MDC is based on the principal diagnosis. The MDC is given "00" for records where the principal diagnosis is not an existing ICD-9-CM code. Beginning with 1993 data, new codes after October 1, are "mapped" by OSHPD's own mapping logic system to the closest equivalent code recognized by the DRG Grouper Version for that calendar year and assigned to an MDC based on that DRG Grouper Version's logic.

CODES, CATEGORIES AND COMMENTS:

Codes: 00-25

MDC 00 is the label for records that could not be assigned to MDCs 1-25 by the DRG grouper (e.g. some records from DRG 470 (ungroupable)).

Appendix B displays the MDC descriptions.

CALIFORNIA PATIENT DISCHARGE DATA

DIAGNOSIS RELATED GROUP
(DRG)

FIELD NAME : DRG

DEFINITION : DRGs are case-mix assignments grouping hospital patients to categories based on diagnostic, therapeutic and demographic characteristics for the purpose of reimbursement. OSHPD purchases the DRG Grouper software from Centers for Medicare and Medicaid Services (CMS) contractor, 3M® Health Information Systems. CMS implements revisions to the DRG Grouper software every October 1, the start of Federal fiscal year for the Medicare Prospective Payment System. The Office implements the same software effective with discharges from the beginning of the following calendar year. Special note - New codes after October 1, are "mapped" by OSHPD's own mapping logic system to the closest equivalent code recognized by the DRG Grouper Version for that calendar year and assigned to a DRG based on that DRG Grouper Version's logic.

CODES,CATEGORIES AND COMMENTS:

Codes: 001-511

Appendix C displays the DRG descriptions.

DEFINITION : The indicator for whether or not the condition was present at admission by reporting Yes, No, or Uncertain for the Principal Diagnosis.

CODES, CATEGORIES AND COMMENTS:

The indicator for the principal diagnosis is defaulted to Yes (present at admission), unless reported otherwise.

PRINCIPAL PROCEDURE

FIELD NAME : PROC_P

DEFINITION : The principal procedure is one which was performed for definitive treatment rather than one performed for diagnostic or exploratory purposes, or which was necessary to take care of a complication.

The principal procedure is the procedure most related to the principal diagnosis.

If only non-therapeutic procedures were performed, then a significant non-therapeutic procedure should be reported. A significant procedure is one that is surgical in nature, or carries a procedural risk, or carries an anesthetic risk, or affects DRG assignment.

CODES, CATEGORIES AND COMMENTS:

The appropriate codes to be entered are specified in the International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), U.S. Department of Health and Human Services, Washington, D.C.

Note: HCPCS and CPT codes are not accepted by OSHPD.

DAYS FROM ADMISSION TO PRINCIPAL PROCEDURE

FIELD NAME : PROC_PDY

DEFINITION : The number of days between the patient's admission date and the date of the Principal Procedure.

CODES, CATEGORIES AND COMMENTS:

If the Principal Procedure was performed prior to admission, this numeric value will be prefixed with a minus (-) sign. The days are calculated by subtracting the date of admission from the date of the Principal Procedure. If the Principal Procedure was performed on the day of admission, the number of days will be zero. If no Principal Procedure or date is reported, the days are shown as zero. The maximum value is 9999, which means that the procedure was performed more than 9998 days after admission.

Through 2000, if no procedure was performed, the days to procedure were shown as -999. For procedures performed on the same day as admission, the days were displayed as zero.

Some hospitals report procedures performed on their inpatients, on an outpatient basis by another facility, during the patient's stay at the reporting hospital. Therefore, not all procedures reported by a hospital were necessarily performed by and at that hospital.

Beginning with 1999, the psychiatric codes from Diagnostic and Statistical Manual of Mental Disorders (DSM), by American Psychiatric Association, Washington D.C., are not accepted by OSHPD.

The appropriate codes to be entered are specified in the International Classification of Diseases 9th Revision, Clinical Modification, U.S. Department of Health and Human Services, Washington, D.C. (ICD-9-CM).

Other Diagnoses do not include E-Codes. E-Codes are located in special E-Code fields.

NOTES

DRGs: First, the major diagnostic category (MDC) is assigned based on the principal diagnosis. Then, the record is assigned to one of the diagnosis related groups (DRG) within that MDC.

Pre MDC DRGs: For the five DRGs listed below, the DRG is assigned first, based on any procedure for liver transplant, bone marrow transplant, tracheostomy, or lung transplant then it is assigned an MDC based on principal diagnosis:

- 480 - Liver Transplant
- 481 - Bone Marrow Transplant
- 482 - Tracheostomy for Face, Mouth & Neck Diagnoses
- 483 - Tracheostomy Except for Face, Mouth & Neck Diagnoses
- 495 - Lung Transplant

Unrelated DRGs: The current version of the Grouper has four DRGs (468, 470, 476, and 477) whose patients may be assigned to a variety of MDCs, based on the principal diagnosis. Patients are assigned to DRGs 468, 476 or 477 when all procedures performed are unrelated to the principal diagnosis. Some patients in DRG 470 are not assigned by the Grouper to any MDC; their MDC is shown as 00 (Ungroupable). Records fall in DRG 470 because the information on the record is considered inconsistent or invalid by the Grouper's algorithm.

CC: **Complications or Comorbidities.** A **comorbidity** is a pre-existing condition which, because of its presence with a specific principal diagnosis, affects the treatment received, and/or length of stay by at least one day in 75% of the cases, and therefore affects the DRG assignment. A **complication** is a condition that develops following treatment and may affect the treatment received and/or may affect the length of stay by at least one day in at least 75% of the cases, and therefore affects the DRG assignment.

The Health Care Financing Administration (HCFA) developed five principles for complication and comorbidity:

- 1 - Chronic and acute manifestations of the same condition should not be considered CCs for one another.
- 2 - Specific and nonspecific diagnosis codes for a condition should not be considered CCs for one another.
- 3 - Conditions that may not coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant should not be considered CCs for one another.
- 4 - The same condition in anatomically proximal sites, such as congenital/acquired, should not be considered CCs for one another.
- 5 - Closely related conditions, such as symptoms to the related condition (e.g., dysuria and urinary tract infection), should not be considered CCs for one another.

Med/Surg codes: P = Procedural (surgical)
M = Medical
